Stainless steel flanges price in China and India varies on many factors. Few manufacturers in China produce pipe flanges in austenitic stainless steel grades like 304, 316 as well in marine grade 316L at very low cost due to reasonable man power and tax structure in China.

These ASTM A182 flanges comes at low prices but most of these manufacturers don't provide material guarantee certificate. At the same time few renowned manufacturers in Gujarat, India uses raw material of renowned mills like Jindal as well as raw material from South Korea and Japan.

These stainless steel flanges cost additional 10% to 15% but comes with material guarantee certificate. In both the countries you can find low priced or high cost flange material in all the types like Slip on, Weld Neck, Blind flange, Forged flange, Threaded Flange and Plate Flange etc.

Price List of 304 Stainless Steel Weld Neck Flange and Blind Flange

316 Stainless Steel Flanges Price in Wuxi, Jiangsu Province (China) & Gujarat (India)

Price variation is seen because of the project location. In other words, different countries have their standards for quoting price of 316 stainless steel flanges to customers. But the motive is the same, to cover wide range of industrial demands and standards.

Considering this and keeping this in mind, there emerged pricing difference. If one purchases the product from India, factors such as GST and other taxes are included with the final product cost. In China, however the transportation cost, availability and many other factors affect selling price cost. But when one checks for price

ASME B16.5/ ASME B16.47

per kg for ASME B16.5 stainless steel forged flanges, more important to customer's demands and standards are given in India than in China. Although both countries promote large scale production, India values customer support and has lesser labour cost.

UNS S30400 WNRF and ASME SA182 Grade F304 SORF Flange Price including Hydrotest and NDT Report

Testing standards also play a prominent role for accurate and precise price quotation when one checks for ASME SA182 F340 SORF flanges price list. Testing methods such as NDT and hydrotesting is one of the most common testing standards. Out of this, hydrotest is the most famous testing type. Though not compulsion testing type, it is very much known to gain fame just because such testing standards are demanded and performed by customer who checks for price of UN2 S20400 WNRF flange. In this way, customer also gets involved and interested to check out for pricing. Also, confidentiality towards the product is achieved, in association with good industrial relations with the company.

ASME B16.5/ ASME B16.47

Pipe Flange Price at Jebal Ali Port, UAE from ½" to 12 Inches Class 150, CL 300 to Class 600

Although providing wider choice options for customers, dimensional aspects also play a major role for checking price of pipe flange. From the size range of 1/2"-12 inches; with associated pressure rating from class 150-class 600, each dimension has unique properties. So, price variations become very ideal in such cases.

Hence, while checking for the price of ASME SA182 SS weld neck flanges, it is important to first be firm with your demands and standards. Only then choose the product. Get price quickly from [suppliers of SS 304 flanges](#) for Korea, India, USA or Europe origin.
